DETAILED ACTION

1. Acknowledgment is made in the receipt of the information disclosure statement and the oath filed February 18, 2004.
2. The drawings were received on May 28, 2004. These drawings are approved.

Allowable Subject Matter

3. Claims 1-20 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record fails to anticipate or render obvious an active suspension system for a vehicle having a mean pressure estimator that provides an estimation of the mean pressure in a strut of the suspension system, wherein the mean pressure estimator determines a mean pressure variation corresponding to a motor speed and flow demand, and updates the estimation of the strut mean pressure with the mean pressure variation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stiller and Williams et al. each teach a vehicle suspension system utilizing pressure sensors for regulating a pressure in a strut. Ganzel teaches a passive suspension system utilizing a lookup table for regulating a pressure in a strut. Dernier et al. teaches a system for determining a pump pressure utilizing pump motor speed information.
